

»In the competitive world of Boiler and Energy Technology we have found a unique method priding ourselves on our excellence and **adding real value to our customers.**«

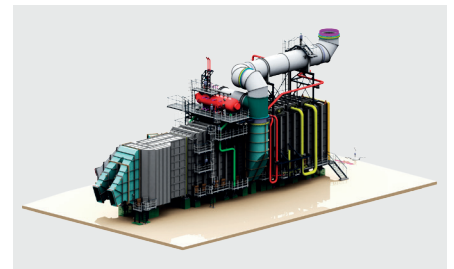

» Specialism

BERTSCHenergy excels in the unique area of the design and fabrication of Process Heat Recovery Systems and Pressure Equipment for Steam Reforming, Haber Bosch, Claus, FCC and Refining Processes in general. Another excellence of BERTSCHenergy is the manufacturing of thick product vessels (e.g. for natural gas).

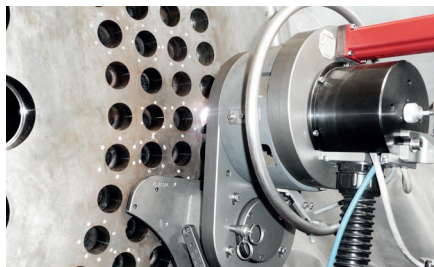

» Excellence for your Profit

With our special know how we are able to provide to the customer a **significant quality**, as well as **cost related advantage**, defined in the combined service of own engineering and in-house fabrication.

» Responsibility – Reliability

We are committed to the responsibility of joining thermomechanical calculations in 3D-design with our highly vertically integrated development, engineering and manufacturing capability. Equipped with the most modern tools for calculations and material processing (e.g. rolling steel plates up to 120 mm, handling a broad range of materials, among them cladding and welding of special alloys, in bore welding of process gas coolers), we deliver worldwide fine products facing temperatures up to 1,300°C and pressures up to 350 barg.

» Customer Satisfaction

BERTSCHenergy: serving a global market

BERTSCH

TRADITION, QUALITY, KNOW-HOW. SINCE 1925
