Service

Operational support, maintenance, modification and optimisation

BERTSCHenergy provides a unique combination of experience and capabilities to develop solutions for their customer's operational and economic goals. The ideal combination of engineering know-how and expert knowledge from project execution and plant realisation covers the range of heat-transfer and high-pressure systems, steam boilers, power plants and auxiliary systems. Our extensive services are based on usage of advanced technology and can be summed up as:

Spare Parts Management: We provide OEM equipment and keep our customers informed of possible upgrades.

On Site Services: Outage planning, commissioning and start up support, as well as assessing the condition of our customer's plants.

Repair and Maintenance: With our technical field service experts we offer our customers regular and preventive services on all levels of plant technology – from boiler components to I+C systems.

Modification and Plant optimisation: We are able to assess plant performance, engineer plant improvements to boost plant efficiency and competitiveness.

Trainings: With our experts we are able to provide customised trainings of our customer's personnel in all areas of operation.

Service packages are dedicated and relevant service modules can be chosen upon individual need and application.

BERTSCHenergy supports its customers and plant operators in all issues of after-sales and go beyond normal repairs. We are constantly on a lookout for long-term-relationships with our customers.
